

D I R E C T I O N S F O R T A K I N G T H E D R O P S.

BEGIN in the morning immediately after breakfast, by taking two drops in the quantity of a small wine-glass of any liquor, viz. tea, water, wine-and-water, &c.---four drops, in like manner, after dinner;---six directly after supper, or at bed-time;---eight the next morning after breakfast, thus gradually increasing two drops each time of taking, to thirty; continue that number three times a day 'till the cure is effected, without intermission, observing only, if they purge (however triflingly) the dose must be lessened, but not omitted, to what agrees, for by acting in that manner they lose their effect, which to prevent is the only reason for their being prescribed in so small a number at the beginning ---With regard to diet, nothing in particular need be observed; in scorbutic disorders, living low, as it weakens the stomach, is hurtful; it is therefore best to live without restraint, ever consulting the appetite or inclination, as to eating or drinking, without excess.

These drops are so perfectly innocent that they may be taken by persons of the most delicate constitutions, women with child, and infants; they may be also taken at any time of the year, without danger of catching cold, hindrance of business, or amusements, as their quality is to strengthen the stomach, create appetite, and by causing a regular and easy digestion, prevent wind from accumulating, the cause of head-achs, vapours, and other indispositions incident to the fair sex.

It is necessary after the disorder is apparently removed, to continue the medicine a little longer, in order to it's being ENTIRELY eradicated.

It is earnestly requested that those who receive benefit by the drops, will send their case (in writing) to Mr. NORTON: it will but be doing justice to him and his medicine, at the same time may be the happy means of administering seasonable relief to those of their fellow-creatures afflicted with the like complaints.

. Notwithstanding the extraordinary success and certainty attending the use of these drops, yet according to the different degree of the distemper, age, and constitution of the patient, the quantity sufficient to perfect a cure greatly varies;---it is therefore necessary, that whosoever begins the drops, should proceed to five or six bottles at least, by which means they will be made sensible, if ever so bad, the medicine will cure them; if a small complaint only, the humour will be ENTIRELY eradicated by that number, which is a trifling expence, considering the danger attending the scurvy, which if not taken care of in time, increases 'till it brings on the following dangerous disorders, viz. if the humour falls on the lungs, from a weak constitution, or by weakening means made use of, such as bleeding, blistering, purging, &c. a consumption is produced;---if on the stomach, a bad digestion, with pains and reachings to vomit;---if the liver is affected, the most terrible billious complaints arise;---if on the lowest intestine, the most obstinate fistulas or piles are brought on;---if it affects the glands, the evil is the consequence;---in short, the Scurvy lays the foundation of all cronic diseases.---That these drops will perfectly cure every degree of this destructive disease, is sufficiently proved by the remarkable cures mentioned in this bill.

For the scurvy, drinking sea-water, bathing in the sea, and salivation are generally recommended as the last resource: ---relative to drinking the sea-water, I have found it, experimentally, hurtful, and bathing a mere recreation; but for salivation, I do not believe it ever was serviceable, on the contrary, confirms it, and at the same time, tends to destroy the patient by undergoing so severe an operation.

N. B. Mr. NORTON may be consulted every *Tuesday* and *Thursday*, GRATIS, from Ten o'Clock in the Morning to Four in the Afternoon.---He will also attend on any of his Patients at their own Houses, by giving timely Notice.

N. B. Each Bill of Direction is signed by the Author, in his own hand-writing, which he begs may be destroyed (after the method of taking the Drops is fully known) to prevent their falling into improper hands, as he has lately discovered their having been industriously collected for the purpose of wrapping round a spurious and, perhaps, dangerous medicine.

J. Norton

A CAUTION to the Publick in General BUT MORE PARTICULARLY TO MERCHANTS, CAPTAINS OF SHIPS, AND THOSE CONCERNED IN TRADING TO THE EAST OR WEST INDIES, &c. Relative to MAREMONT'S ANTISCORBUTIC DROPS, Prepared by Mr. NORTON, Surgeon, Golden-square near Piccadilly, London, ONLY PROPRIETOR AND INVENTOR OF THEM.

THE daily complaint of injuries received by *spurious medicines* sold for mine, requires the most serious attention, as well in *safety* to the patient, as my own interest: those impostors not only attempt to deceive by having bills printed like mine, with bottles of the same mould and inscription, but are even *daring enough to counterfeit my hand-writing*, by so exact an imitation (in print) from a wooden cut, that it is difficult to discover the fraud unless taken to a printer; the initials J. N. are likewise made use of, which were never wrote by me; some have been punished, notwithstanding which, the same malpractices are continued; others use more caution by vending medicines under the names of MEREDENT, MERIDENT, NORDON, &c. and several make use of *their own names*, alledging their having been assistants to me.---Can it be possible for any person to think me so weak, as to disclose so *valuable* a secret to my servants, more especially to those of so *menial a sort* as to be employed in the distribution of pamphlets, packing up and delivering boxes at the different inns, with every drudgery attendant?

JOHN NORTON.

Sign'd by the inventor

FROM THE MANY EXTRAORDINARY WELL AUTHENTICATED CURES ALREADY PUBLISHED, some of which are here inserted, and the daily proofs Mr. NORTON has of the efficacy of his DROPS, he can justly recommend them as effectual in entirely eradicating the following disorders, which he is convinced, from experience, arise from the same cause, viz. The Leprosy, Scurvy, old Sores or Ulcers, large Blotches or Boils, the Evil, Fistulas, Piles, pimpled Faces, long continued Inflammation of the Eyes, Bilious Cholic, St. Anthony's Fire, Scorbutic Gout and Rheumatism, and every other disorder arising from a foulness of the blood. They also perfect digestion, amazingly create an appetite by strengthening the stomach, and will act as a restorative to the most reduced constitution. They may be taken in any season, by the most delicate, without the least confinement, danger of catching cold, or hindrance of business. Their singular efficacy in removing the maladies too frequently the consequence of inoculation, however skilfully practised, induces him earnestly to recommend them, assured of their happy effects in cases, even when, from a long continuance of sharp corroding ulcers, the bones have been ultimately affected, and the limbs endangered. The Safety with which they may be administered to children, infants, and women during pregnancy, is an additional encouragement to the timely use of them.

C U R E S.

A CURE authenticated by SIR GEORGE ARMYTAGE, BART. of Kirkcaldy-Hall, in the West-Riding of the County of York.

S I R,
To Mr. NORTON, Surgeon, Golden-square, London.
JOSEPH WOOLMERSLY, a tenant of mine, 22 years of Age, of the parish of Clifton, had two ulcers on his left hand, each as large as a crown piece, running a sharp humour, another in his elbow, five in his right side, five in his right shoulder, five in his right leg, and one over his left eye, all equally as large; a contracted knee with a most violent inflammation, which deprived him of the use of it; after taking two Six Shilling Bottles of your Drops, the inflammation subsided, and broke out into an ulcer, which gave him the entire use of it; by the time he had taken ten, he was perfectly cured, and has remained well ever since; this cure was effected in the year 1775.
Kirkcaldy, August 25, 1780.
I am, Sir, your most humble Servant,
S I R,
G E O R G E A R M Y T A G E.

NUMBERS have testified the benefit received by the use of your Maredant's Drops, but no person with greater reason than myself. I have experienced their happy effects in the cure of an inveterate Scorbutic Humour in my legs, and eruptions all over my body. It this addition to your list of certificates will be of service to you, or mankind in general, I cannot object to its publication, having discontinued the Drops twelve months without the least return of the complaint. Iffeworth, Middlesex, April 27, 1780.
I am, Sir, your very humble Servant,
T H O M A S C L E M E N T.

S I R,
UNSOLICITED, with pleasure I acknowledge the excellency of your Drops. A Scorbutic Humour having settled in my leg, from a wound (occasioned by the kick of a horse) afflicted me fourteen years, during which time I had recourse to many regular Surgeons without effect, until happily a friend recommended your Drops, himself having been cured by them, I followed his advice, and in taking Six Bottles (bought of Mr. Frost, at Chelmsford,) the slow lurking fever I had been subject to subsided, my leg became covered with red angry pimples, that soon gave way to the searching quality of your Medicine, and is now clear, sound, and well; my constitution is also totally recovered, nor have I had the least return of the disorder these three years, and although fifty-five years of age, am as well as I was at twenty.
Southminster, Essex, March 17, 1780.
P. S. Mr. Frost of Chelmsford, and many others, can witness to the truth of this cure.
I am, Sir, your humble Servant,
T H O M A S S P R I N G A L L.

S I R,
I WAS afflicted with a most inveterate Scurvy, attended with a total loss of appetite, which reduced me so low in spirits and strength, that I could scarce walk, until being recommended to your Drops; after taking little more than half a bottle of them, I recovered my appetite, and by a longer continuance they entirely eradicated the Humour, which at first appeared in large pimples with yellow heads, then spread itself in scabs or scales all over my body. I am now in perfect health, and am, with the utmost gratitude.
Fair-street, Horsey-down, March 8, 1780.
Sir, your very humble Servant,
M A R T H A T H W A I T S.

S I R,
THE cure I have received by the use of your Maredant's Drops, impels me, not only in justice to you but for the benefit of mankind, to make my case public. I was severely afflicted with eruptions all over my body, my legs and arms were exceedingly swelled and inflamed, attended with extreme heat and violent pain; I was a long time in this deplorable situation, and had tried various means without effect, until I happily had recourse to your Drops, which at first threw the humour more out, but by a perseverance (according to your instruction) the disorder disappeared, and its being several years since, there can be no doubt of an absolute cure.
Wantage, Berkshire, October 28th, 1779.
I am, Sir, your humble Servant,
W I L L I A M L A U R E N C E.

S I R,
BY the use of your Drops I am perfectly cured of the Scurvy, which affected both my legs and arms, accompanied with a most violent humor which entirely stripped off the skin; it first appeared as a pimple on my left leg only, then gradually encreased to that degree of inveteracy just mentioned; I had before tried every method recommended to me in vain.
Charterhouse-lane, London, May 10th, 1779.
I am, Sir, your humble Servant,
J O H N B R O W N.

P. S. Several people in the neighbourhood where I live can assert this as a fact.
S I R,
I WAS exceedingly afflicted with the Scurvy, which I am convinced your Drops have entirely eradicated as it is above two years since I discontinued them; my skin universally rough (from the pores being obstructed) was covered with blotches, extremely painful. In justice to your most excellent Medicine, and for the benefit of those afflicted as I was, I send you this extraordinary cure to publish.
I am, Sir, your very humble Servant,
M A T T H I A S C A L V E R T, Captain in the East-India Company's Service.

THE FOLLOWING CURE AUTHENTICATED BY JAMES COWPER, M. D. of JOHN-STREET, CAVENDISH-SQUARE.

S I R,
I HAVE here inclosed you my certificate of Roderic McDonald's being cured, in all appearance, of that rank scorbutic eruption, which for many years past has constantly resisted the power of variety of medicines taken by him (to my certain knowledge) until it vanished by the use of your Drops; For which he returns you his most grateful thanks, and from motives of justice and humanity, as well as gratitude of your patient, you are at full liberty to make this case public, and my certificate of the cure,
I am, Sir, your most obedient and most humble Servant,
J O H N C O W P E R.

P. S. I have just now seen and examined the case of Mrs. Mary Lute, on whom I find you have performed a most marvellous cure, of three years standing, of the Scrophula, commonly known by the name of King's Evil—You must be very happy, when reflecting you have it in your power to give relief to so many suffering mortals, which such extraordinary cures prove you have.

S I R,
In justice to the merit of your valuable medicine, and for the benefit of my fellow-creatures, I beg you will publish the following case: I was afflicted with a severe and obstinate Scurvy for near two years; I applied to several of the faculty for relief, without the least appearance of success, my disorder growing worse instead of better; in this situation, by the advice of a friend, in the beginning of March 1776, I made trial of Maredant's Drops, my legs, arms, and other parts of my body were exceedingly inflamed and painful; in short, my life became burthenome, having entirely lost my appetite, nor could I get but very little rest; I took three bottles after the disappearance of the disorder, and at this time (it is fifteen months since I left them off) am, thank God, in a good state of health, and free from every complaint.
Witnes, I am, Sir, your most humble Servant,
Edward Snelson, Nantwich, Sept. 13, 1777.
W I L L I A M B R E E Z E.

Teacher of Writing and Mathematics, at Audlem, Cheshire.

As it has been maliciously insinuated that Mr. NORTON is not a surgeon, with a design to prejudice him his character and practice, he therefore thinks it necessary to vindicate himself, by assuring the public he served a regular apprenticeship to surgery, hath been examined both for the Navy and Army, and declared sufficiently capable, and that he is also a freeman of the Corporation of Surgeons of London; to prove which the following is a true copy of his Diploma.

"KNOW all Men by these Presents, That We, the Master, Wardens, and the Rest of the Court of Examiners of the Company of Surgeons of London, to that Purpose chosen and constituted by the Authority of Parliament, have deliberately examined Mr. JOHN NORTON, and do find him a fit and capable Person to exercise the Art and Science of Surgery; and We do admit him to practice in the said Art, according to the Force, Form, and Effect of the Statute in that Case made and provided. In Witness whereof We have subscribed our Names, and have caused the Common Seal of the said Company to be set to these Presents.

" John Blagden, Master.

" D. Middleton,
" Christopher Fullagar,

Robert Young, } Wardens.
Percival Pott, }

John Townshend,
Robert Adair.

" Registered by Jos. Cruttenden, Cl. Dated 15th December, 1763."

These Drops are sold in square Bottles, by Mr. NORTON, Surgeon, Golden-Square, LONDON, at Half-a-Guinea and Six-Shillings each; with the following inscription on them, viz. (JOHN NORTON, only Proprietor and Author of MAREDANT'S DROPS) those of Half a Guinea are sold at his House only, therefore must be genuine; He earnestly entreats those who are inclined to take his Bottles of Six-Shillings, that they will be extremely cautious of whom they buy them.
